

SANJAY JAT

AI/ML Engineer | Backend Developer | B.Tech CSE (3rd Year)
6377354339 | Sanjayjat354339@gmail.com | LinkedIn | GitHub | Rajasthan, India

PROFESSIONAL SUMMARY

3rd-year B.Tech CSE student with hands-on experience building production-grade machine learning and backend systems using Python and FastAPI. Currently completing a 6-week AI/ML internship at Internpe and hold Job Simulation certifications from Deloitte and Tata in data analytics and GenAI-powered analytics. Seeking an AI/ML Engineer or Backend Developer internship to contribute to scalable, data-driven products.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL

ML / AI: XGBoost, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

Backend: FastAPI, SQLAlchemy, PostgreSQL, Supabase, JWT Auth, REST APIs, APScheduler

Frontend: React.js, Tailwind CSS, Recharts, Axios

Tools: Git, GitHub, VS Code, pgAdmin, Postman

Deployment: Vercel (frontend), Render (backend), Supabase PostgreSQL

INTERNSHIP EXPERIENCE

AI/ML Intern — Internpe (Virtual Internship Program)

Jun 2026 – Present

6-week project-based AI/ML internship, Batch 9.142

- Completed a structured, project-based AI/ML internship covering end-to-end model development — from data preprocessing and EDA through deployment-ready evaluation
- Built a Diabetes Prediction classifier on patient health data, training and benchmarking Logistic Regression, Random Forest, and SVM models in a complete Colab pipeline
- Built a Car Price Predictor on the Quikr used-car dataset using Linear Regression, achieving ~92% R^2 through feature engineering and exploratory data analysis
- Published technical project walkthroughs for each milestone on LinkedIn, translating ML workflows into clear, audience-accessible write-ups

PROJECTS

FinanceAI — Financial Signal Classification System

Jan 2026 – Present

FastAPI · XGBoost · React · PostgreSQL · Vercel · Render

- Built a production-deployed, full-stack ML platform generating next-day BUY/SELL signals for Gold, Silver, and Nifty 50 using XGBoost trained on 10 years of market data
- Engineered a complete data pipeline — feature engineering (RSI, MACD, MA7/MA30, Volatility, TrendStrength) → model training → REST API → React dashboard with live charts
- Achieved 59% accuracy on binary close-price classification with XGBoost (Precision 0.56, Recall 0.59, F1 0.53)
- Implemented JWT authentication, a backtesting engine, per-user signal history, a live financial news feed, and automated weekly model retraining via APScheduler
- Deployed on Vercel (frontend), Render (backend), and Supabase PostgreSQL (database) with full CI/CD via GitHub auto-deploy

Trader Sentiment Analysis

Mar 2025

Python · Pandas · Matplotlib · Seaborn · Jupyter Notebook

- Analyzed the relationship between the CNN Fear & Greed Index and real trader behavior across PnL, trade frequency, and risk-taking patterns using two merged datasets
- Found that traders take their largest positions during Extreme Fear but achieve highest profits during Extreme Greed — a measurable emotional trading mismatch
- Built an end-to-end data pipeline: loading, cleaning, date-alignment, feature grouping, and visualization using bar charts, distribution plots, and heatmaps
- Derived actionable strategy insights: reduce position sizes during high-fear periods; use trend-following strategies during greed phases to maximize returns

EDUCATION

Amity University Rajasthan — B.Tech, Computer Science & Engineering

2024 – 2028

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Database Management, Python Programming

CERTIFICATIONS

- Data Analytics Job Simulation — Deloitte Australia (Forage), Jun 2026 | Data Analysis, Data Modeling, Visualization
- GenAI Powered Data Analytics Job Simulation — Tata (Forage), Jun 2026 | AI Strategy, Predictive Analytics
- Data Analytics with Python — NPTEL Elite, IIT Roorkee (SWAYAM), Jan–Apr 2026 | 81%, 4 Credits
- Mathematical Foundations of Machine Learning — NPTEL, IISc Bangalore (SWAYAM), Jan–Apr 2026 | 55%, 4 Credits
- Intro to Machine Learning, Data Visualization, Pandas — Kaggle — Jan 2026
- Python Skill Up, C++ Skill Up — GeeksforGeeks (NationSkillUp) — 2025

EXTRACURRICULAR & LEADERSHIP

Google Student Ambassador — Google Gemini Program, Amity University Rajasthan

Dec 2025

Selected as Google Student Ambassador, demonstrating leadership, collaboration, and initiative in promoting AI literacy on campus.
